EDUCATION

- **University Institute of Engineering and Technology** Rohtak, Haryana
Bachelor of Technology - Computer Science and Engineering; GPA: 8.88 July 2019 - June 2023
Courses: Operating Systems, object-oriented design, , algorithms, data structures, databases, RDBMS, big data, programming concepts, API design, web technologies

SKILLS SUMMARY

- **Languages:** Java, Python, Javascript
- **Frameworks:** Spring Boot, React js, Node js, Express js
- **Database:** NoSQL - MongoDB, SQL server, MySQL, Redis, PostgreSQL
- **Tools:** Code versioning tools (GIT), Amazon Web Services(AWS), Docker, Kubernetes, Linux, Postman
- **Soft Skills:** Analytical skills, time management skills, Strong problem solving skills, Strong communication skills

EXPERIENCE

- **Full Stack Developer.** In office
Media Jedi Feb 2023 - March 2024
 - Worked on the complete lifecycle of a project, from concept and design to testing and deployment.
 - Collaborate closely with frontend developers to integrate backend functionalities seamlessly..
 - Write clean, efficient, and scalable code that meets coding standards and best practices.
- **SDET - Automation testing** Remote
SonicWall(Intern) Oct 2022 - Feb 2023
 - Optimizing and resolving bugs in the backend libraries of the Capture client console.
 - SonicWall Capture Client is a unified client platform that delivers multiple Endpoint Detection Response (EDR) capabilities.
 - Tech stack used - Python, Python libraries(pyPDF2, Pyautoit, datetime, CherryPy, PyTest and many more), Cucumber, Selenium,
- **Associate Product Manager - Content.** Remote
Interview Kickstart(Intern) Feb 2022 - Aug 2022
 - Continually evaluate the performance of products and features against goals and develop recommendations for improvement.
 - Create data driven models and analytical approaches to determine business performance, growth and emerging opportunities.
 - Managing a team of technical coaches.

PROJECTS

- **MJ Widgets (HTML, CSS, MERN stack):**
 - In this project, you can explore our wide range of widgets tailored to suit your needs.
 - Easily generate a customized widget directly on our website.
 - You can create widget on our site and we will provide you with a HTML Code.
 - Just paste the code anywhere in your website where you want to display the widget.
- **E-commerce web-app (HTML, Spring Boot, Hibernate, Google Oauth, Lombok, Thymleaf): Project Link**
 - This web application is an e-commerce website developed using Java spring framework.
 - Tech Stack Used: Spring Boot, H2 database, Thymeleaf, Google OAuth, Lombok
 - It has two users:
 - Admin: Add, update and delete Product. Each product belongs to a particular category.
 - User: Can explore products and add to cart.

HONORS AND AWARDS

- 4 Star at CodeChef).
- Global rank 52/30000+ participants in February's long challenge on codechef.
- Global rank 57/30000+ participants in March's long challenge on codechef.

COMMUNITY WORK

- **Google Developers Club:** Helping my juniors excel in competitive programming and problem solving
- **Codechef UIET Rohtak chapter:** Organizing coding contests in my college.
- **GirlsScript UIET Rohtak chapter:** Organizing events and spreading awareness about latest tech trends.
